

INTELLIGENT AUTOMATION YOU CAN TRUST

ImageTrust delivers web-based **intelligent document capture and orchestration** for modern enterprises. Built to perform seamlessly across both distributed and centralized environments, ImageTrust removes traditional capture limitations and enables secure, concurrent use, across departments & document types. From high-volume production scanners to email and mobile capture, ImageTrust unifies and governs document intake across every channel, using AI-driven automation to route, classify, and validate content, delivering trusted data to the systems your business depends on.

Trusted insight stems from trusted intake. The ImageTrust platform provides one of the most intuitive intake experiences available, with a batch management interface that visually mirrors the structure and appearance of your physical or digital documents. ImageTrust seamlessly handles content from every intake channel, including desktop/high-volume scanners, monitored folders, email ingestion, drag-and-drop upload, and guided, outward-facing submission experiences.

Through **Trusted AI Connectors**, ImageTrust enables enterprises to operationalize AI faster than ever before—allowing your team to leverage the model that delivers the best accuracy and automation for your document types while avoiding model lock-in.

When confidence is low, human validation steps in. When model confidence is low, ImageTrust provides a Human-In-The-Loop (HITL) validation step. Allowing for intuitive exception handling, review, and correction to enhance accuracy while capturing performance insights.

Bring intelligence directly into your workflows. ImageTrust integrates with existing systems through low-code configuration and embeds into web-based applications, ensuring that enhanced intelligence is readily available exactly when and where it is needed most.

INTAKE YOU CAN TRUST

ImageTrust is built to meet the demands of enterprise environments at every level.

Scalability
From ad-hoc intake to high-volume operations.

Flexibility
Adapt seamlessly to any environment or requirement.

Security
Protect data integrity at every stage of document intake.

Reliability
Unparalleled performance and uptime

AI MODEL INTEGRATIONS

ImageTrust's native integrations give you easy, rapid connectivity to the latest AI models from top hyperscalers and leading boutique AI providers, so your organization always has access to the best available intelligence.

- **Google:** Gemini, Document AI, Cloud
- **Microsoft Azure:** AI Document Intelligence, AI Content Understanding, OpenAI
- **AWS:** Textract, Bedrock Data Automation, S3
- **Salesforce, SharePoint, Box, CMiC, and custom portals**
- **ChatGPT, Hyperscience, and more.**

DIGITAL TRANSFORMATION SOLUTIONS

Bringing innovation to automation with our trusted digital transformation solutions.

- ✓ **Accounts Payable & Invoice Automation**
- ✓ **Sales Order Processing**
- ✓ **Claims processing**
- ✓ **Digital Mailroom Automation**
- ✓ **Content Migration**
- ✓ **Business Process Outsourcing**
- ✓ **New Account Opening**
- ✓ **Health and Human Services**
- ✓ **Legal Processing and Subpoena Requests**

"ImageTrust was the natural choice when selecting a capture and document processing solution that could be leveraged across all programs."

IT Director, Department of Human Services

"It is web based, enabling us to easily implement and deploy AI-powered capture to literally 100s of departments and 1000s of users."

IT Director, Major International Bank

"Image Access is a true partner, demonstrated through consistent, high-quality service."

Sr. VP of Customer Relationship Mgmt, Global BPO

Speak with an Image Access consultant about your document workflow environment, your integration requirements, and what a production-ready ImageTrust implementation looks like for your organization.
